SUMMARY

Experienced Frontend Developer with a strong focus on modern frameworks (React, Vue.js, Next.js), UI/UX design, and performance-driven development, with over one year of professional experience in Germany (Posterlounge GmbH). Specialized in accessible (WCAG 2.1), responsive, and high-performance web solutions, including hands-on speed optimization using Lighthouse and Core Web Vitals. Proficient in agentic-coding workflows: I deeply integrate Claude (Claude Code), GitHub Copilot, MCP servers, and custom skills into my development process — including RAG-based documentation retrieval via NotebookLM and running local LLMs for privacy-sensitive tasks. My goal is to create measurable impact through innovative web solutions and to design complex processes in a user-centric way.

TECHNICAL SKILLS

React, Vue.js, Next.js, Node.js, Zustand, Redux, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Sass, REST API, Supabase, Firebase, MongoDB, SQL, WebSockets, Socket.io, Jest, Git, Webpack, Gulp, Performance Optimization (Lighthouse, Core Web Vitals), Basic SEO, CorelDRAW (basic design work), Claude (Claude Code), GitHub Copilot, Cursor, MCP, NotebookLM, Ollama (Qwen, Gemma), Zapier

PROFESSIONAL EXPERIENCE

CABINET — CRM/SaaS Platform (cabinet.com.ua)

01/2026 – present

Frontend Developer (volunteer) · *Next.js · React · TypeScript · Zustand · Ant Design · next-intl · Socket.io*

- Built the core scheduling and calendar module (appointments, breaks, employee availability), including guard logic that blocks scheduling on incomplete profiles.
- Implemented cookie-based JWT authentication with automatic token-refresh-and-retry, plus email flows for account confirmation and deletion.
- Delivered a full services CRUD with server-side sorting and filtering, and a public online-booking flow with URL-derived booking tokens.
- Engineered app-wide UX infrastructure: a global progress bar with click-blocking overlay and table skeletons via Axios interceptors and Zustand.
- Set up internationalization (next-intl) for 3 languages (UA/EN/RU) with locale-based routing; profile management, payments, and a superadmin role.

AI-Assisted Development (Agentic Coding):

- Leveraged Claude (Claude Code) as an agentic development partner for feature scaffolding, refactoring, debugging, and automated code reviews; GitHub Copilot for inline completion.
- Configured MCP servers (Model Context Protocol) connecting external tools (ClickUp, Postman, Google Drive), plus custom skills and hooks (CLAUDE.md, settings.json) to enforce project standards.
- Integrated NotebookLM as a RAG knowledge base and ran local LLMs (Qwen by Alibaba, Gemma by Google) via Ollama for privacy-sensitive tasks.

POSTERLOUNGE GMBH

10/2024 – 01/2026

Fullstack Developer · *HTML · JS · PHP · SQL · Smarty*

- Implemented high-performance, responsive user interfaces in strict accordance with design specifications (Figma).
- Improved page load speed by ~10% through targeted frontend performance optimization, guided by Lighthouse audits (asset/image optimization, reducing render-blocking resources, code cleanup).
- Developed, maintained, and optimized responsive web interfaces with HTML, CSS, and JavaScript; analyzed and fixed UI, browser, and rendering issues.
- Ran frontend tests (unit and component tests) to ensure code quality.
- Implemented simple backend functions in PHP and wrote SQL queries for data processing.
- Ensured cross-browser compatibility, optimized frontend performance, and took part in code reviews.

JUNFOLIO 12/2023 – 10/2024

Junior Fullstack Developer · *Next.js · Node.js · React.js · HTML5 · Sass · WebSockets*

- Built a chat-roulette platform with registration and a microservices architecture; responsible for both backend and frontend.
- Took part in all development phases — from requirements analysis and design to testing and implementation.
- Optimized application performance and ensured security and reliability within an agile, cross-functional team.
- Collaborated with other team members, including designers, testers, and project managers, to achieve shared goals and deliver tasks within set deadlines.

ARGO ADVISORY (Austria, Remote) 12/2023 – 02/2024

Junior Fullstack Developer (Internship) · *HTML · JavaScript · Sass*

- Led the development of the company website; worked closely with designers for a consistent and appealing online presence.

BAZA TRAINEE UKRAINE 09/2023 – 12/2023

Junior Frontend Developer (Volunteer) · *Next.js · React.js · HTML5 · Sass*

- Developed and maintained web applications using modern client-side technologies.
- Took part in all development phases and optimized performance and scalability within a cross-functional team.
- Collaborated with other team members, including designers, testers, and project managers, to achieve shared goals and deliver tasks within set deadlines.

VOLUNTEERING & OPEN SOURCE

IT Volunteers Ukraine — Frontend Mentor Volunteer · ongoing

Mentor for junior developers across two open-source projects · *Next.js · React · TypeScript · Vite · PostgreSQL · Jest*

- Mentoring junior developers: code reviews, architecture guidance, Git workflow, and best practices in agile, distributed teams.
- ak12 (github.com/it-volunteers-ukraine/ak12): Next.js, TypeScript, PostgreSQL, Jest, Docker — CI/CD via GitHub Actions, deployed on Vercel.
- Verdora (github.com/IRFI4/Front-end-Verdora): React, Vite, TypeScript — project setup, ESLint/Prettier/Husky, code quality.

EDUCATION

- IT School GoIT — "Full-Stack Developer" · 02/2023 – 01/2024
- IT Courses BeOnMax — "Web Developer" · 09/2022 – 02/2023
- National University "Odessa Maritime Academy" — Bachelor of Navigation · 09/2016 – 02/2021
- Moscow State University of Water Transport — Bachelor of Law · 09/2003 – 02/2009

STRENGTHS

- Analytical thinking: translating complex problems into scalable solutions.
- Communication: effective collaboration in agile, cross-functional teams.
- Innovation: enthusiasm for modern tools such as agentic coding to boost efficiency.
