Summary

Frontend and full-stack developer based in Leipzig, in continuous commercial work since late 2023, almost always with React and TypeScript. At CABINET, a multi-tenant CRM for service businesses, I work on the web application and build its mobile app in React Native. The UI works against an OpenAPI specification, and I check every new endpoint against that contract before integrating it. On the server side I work with Node.js, Express, PostgreSQL and Redis. At a hackathon I built webcam gesture detection with TensorFlow.js, and our team took first place. I use Claude Code every day, with my own subagents that check types, lint, build and the diff before I commit.

Technical Skills

Frontend · React, TypeScript (strict mode), Next.js (App Router), Vite, HTML5, CSS3, Sass

Components and UI · Ant Design, Material UI, Tailwind CSS, reusable components, config-driven form builder, light and dark themes with design tokens from Figma

UX · Implementation from Figma, accessibility (WCAG 2.1), responsive interfaces, internationalization (next-intl)

Data and APIs · REST, OpenAPI / Swagger, typed API clients generated from the schema, TanStack Query, Zustand, Redux Toolkit, Axios with interceptors, Zod, WebSockets (ws, Socket.io)

Visualization · Dashboard widgets and charts, calendar and timeline views, OpenLayers (vector layers, GeoJSON, live positions), TensorFlow.js (PoseNet, Handpose) in the browser

Mobile · React Native, Expo (expo-router, EAS Build), NativeWind

Testing and tooling · Jest, React Native Testing Library, Vitest, Playwright, Git, GitHub Actions, code reviews and pull-request workflow, ESLint / Prettier

Back end · Node.js, Express, PostgreSQL, SQL, Redis, JWT with refresh rotation, Docker, Docker Compose, PHP

Professional Experience

CABINET, CRM for service businesses (cabinet.com.ua)

01/2026 – present

Full-Stack Developer, frontend focus · **Open source**

React · Next.js · TypeScript · Zustand · Ant Design · React Native · REST

- Multi-tenant SaaS for business customers: data tables with server-side sorting, filtering and paging, loading skeletons, analytics widgets on dashboard endpoints, a calendar module with bookings, breaks and staff availability on a timeline.
- Checked every new API integration against the OpenAPI specification first. This exposed several supposed frontend bugs as contract errors.
- Noticed the UI made many separate API calls, convinced the back-end colleague with a small Node.js prototype of a consolidated endpoint, and we reduced the requests together. The page now loads roughly 20 % faster (estimate).
- Global loading states via Axios interceptors and Zustand, roles up to super admin, payments with 3D Secure, internationalization with next-intl.
- **Mobile app for business customers, since 10/2026:** React Native with Expo; calendar, booking form, client management, staff schedule, profile and settings in two weeks, built from Figma with light and dark themes, API client generated from the OpenAPI specification, 28 test files. Currently running on Android, private repository.

Posterlounge GmbH, Leipzig, e-commerce

10/2024 – 01/2026

Junior Full-Stack Developer

JavaScript · TanStack Query · PHP · SQL · Smarty · WordPress

- Implemented interfaces from Figma, analyzed and fixed UI bugs and browser issues.
- Made the whole shop accessible ahead of the German accessibility act (BFSG, WCAG 2.1): semantic markup, keyboard navigation and focus management, ARIA, accessible forms, verified by an external audit.
- Wrote unit and component tests, took part in code reviews and acted on feedback.
- Implemented and adapted back-end functions in PHP, wrote and optimized SQL queries.

Junfolio, chat-roulette platform 12/2023 – 10/2024

Junior Full-Stack Developer *React · Next.js · Node.js · TypeScript · WebSockets · Sass*

- Ten months responsible for both front end and back end; real-time audio chat between users in the browser, with WebSockets as the signaling channel.
- Shortly before launch the back-end developers left the team. At my suggestion I rebuilt the missing API services in Node.js with API contracts in TypeScript. The product launched.

Earlier positions 09/2023 – 03/2024

- **Gamirare, game studio**, Full-Stack Developer (internship), internal admin tool with React, Redux Toolkit and Ant Design, 01/2024 – 03/2024.
- **Argo Advisory, Austria**, Junior Full-Stack Developer (internship), 12/2023 – 02/2024.
- **Baza Trainee Ukraine**, Junior Frontend Developer (volunteer), 09/2023 – 12/2023.

Awards and Projects

1st place, Future Simple Hackathon 06/2024

React · TypeScript · TensorFlow.js (PoseNet, Handpose)

- Learning app for toddlers, built by a team of several developers. My part: analyzing the webcam image with PoseNet and Handpose and detecting which point (nose, eyes, shoulders) the fingertip is touching.

1st place, III YEPS Hackathon 07/2023

- Vinnytsia IT Academy (INTITA) and Youth Employment Centre.

Mini Fleet Monitor · github.com/Arag0rn/mini-fleet-monitor 10/2026

React · OpenLayers · Node.js · PostgreSQL · Redis · ws · Docker Compose

- Virtual patrol robots live on an OpenLayers map, patrol area as GeoJSON, a fading trail behind each robot. Positions every two seconds via Redis Pub/Sub and WebSocket.

openapi-contract-mcp · github.com/Arag0rn/openapi-contract-mcp 09/2026

TypeScript · MCP · Vitest · GitHub Actions

- MCP server that lets an AI agent check requests against an OpenAPI specification. 36 tests, CI on Node 20, 22 and 24, agent evals with 9 scenarios.

ak12 · github.com/it-volunteers-ukraine/ak12 **Open source, mentor**

Next.js 16 · React 19 · TypeScript · PostgreSQL · Supabase · Zod

- Set up the config-driven admin area and built its foundation: forms are described as configuration (fields, languages, layout, styling at form, section and field level) instead of being written by hand. The team then developed the form builder further.

Education

GoIT IT School Full-Stack Developer retraining, team lead on two projects · 02/2023 – 01/2024

BeOnMax IT Courses Web Developer · 09/2022 – 02/2023

National University “Odessa Maritime Academy” BSc Nautical Science · 09/2016 – 02/2021

Moscow State University of Water Transport BSc Law · 09/2003 – 02/2009

Personal

- Work permit for Germany, based in Leipzig.
- My German is at B2 level, which works well for me in the team and in code reviews.
